RESEARCH INTERESTS	For my long-term research goal, I've been dedicated to developing lifelong adaptability in embodied AI systems and multimodal foundation models (e.g., VLM, MLLM, diffusion models) within dynamic real-world environments. These systems aim to be reliable, improvable, interactive, and compositional, addressing practical, real-world challenges to better understand human behavior and significantly impact our daily lives. My research interest includes the following topics: <ul style="list-style-type: none"> <li>• <a href="#">Multimodal/Video Large Language Models</a>: Comprehension, Generation, and Faithfulness</li> <li>• <a href="#">Compositional Generalization</a>: Continual Learning and Compositional Reasoning</li> <li>• <a href="#">Efficient Training/Inference</a>: Parameter-efficient Learning, Model Compression, and Federated Learning</li> </ul>
