Research Interests

I aim to build AI systems that live and learn in the real world by perceiving multimodal signals, interacting with complex environments, and continually evolving while remaining reliable, adaptive, and trustworthy.

- **Multimodal Understanding:** Embodied AI, vision-language-action reasoning, long-video understanding, scalable multimodal models, and evaluation.
- **Self-Evolving AI:** Lifelong and open-ended learning, multimodal memory, model editing, generative planning, and test-time adaptation.
- **Video Generation:** Text/image-to-video, world modeling, multiview synthesis, long-horizon prediction, and physics-informed generation.
- **Trustworthy AI:** Hallucination detection and correction, safety-aware generation, explainable reasoning, and AIGC evaluation.
- **Multi-Agent Systems:** Coding agents, multi-agent RL, role-specialized agents, efficient collaboration, and simulation.
