RESEARCH INTERESTS	My long-term research vision centers on developing continually adaptable and trustworthy multimodal AI systems. To this end, I aim to: (1) enable seamless and scalable continual integration of diverse tasks, datasets, and modalities to support long-term generalization, (2) facilitate efficient and robust adaptation to novel data distributions and dynamically changing environments even after model deployment, and (3) ensure high reliability, safety, and faithfulness in multimodal learning, both in reasoning and generation under real-world conditions.
